Tirupur / Coimbatore, Tamil Nadu, India

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer & AI Integration Developer with 5+ years of experience building scalable, user-centric web applications, RESTful APIs, and mobile backends. Proficient in the MERN Stack (MongoDB, Express.js, React.js, Node.js), PHP frameworks (Laravel, CodeIgniter), and modern DevOps (Docker, CI/CD, Nginx). Experienced in integrating AI/LLM technologies — including Claude (Opus 4.6, Sonnet 4.6, Haiku 4.5), GPT models (GPT-5.4, GPT-5.3), and Google Gemini (Gemini 3 Pro, Nano Banana, Imagen 4, Veo 3.1) — into development workflows for AI-assisted coding, content generation, and automated testing. Proficient in RAG pipelines, Agentic AI patterns, and LLM integration to accelerate development productivity by 3x. Delivered 30+ end-to-end production projects and applications across e-commerce, ERP, CRM, fintech, and insurance domains, with a focus on user experience, accessibility, and mentoring junior developers.

EDUCATION

Kongu Engineering College

B.E. in Electronics and Communication Engineering; Percentage: 78%

Erode, India

2016 – 2020

Kumutha Higher Secondary School

HSC; Percentage: 91% | SSLC; Percentage: 90%

Tirupur, India

2013 – 2016

SKILLS SUMMARY

- **Languages:** JavaScript, TypeScript, PHP (Core PHP), HTML5, CSS3, SQL
- **Frontend:** React.js, Next.js (SSR/SSG), Redux, Tailwind CSS, Bootstrap, jQuery, Responsive Design, Accessibility (WCAG)
- **Backend:** Node.js, Express.js, Laravel, CodeIgniter, REST APIs, GraphQL, WebSockets, Sequelize, Prisma ORM
- **Mobile:** React Native, REST API Integration (Android & iOS), Firebase Push Notifications
- **Databases:** MongoDB, PostgreSQL, MySQL, Firebase Realtime DB, Redis (Caching)
- **AI & LLMs:** Claude (Opus 4.6, Sonnet 4.6, Haiku 4.5), Claude Code, GPT-5.4, GPT-5.3, Gemini 3 Pro, Nano Banana, Imagen 4, Veo 3.1, RAG, Agentic AI, LLM Integration, Prompt Engineering
- **DevOps:** Docker, Nginx, VPS, CI/CD Pipelines, GitHub Actions, AWS (EC2, S3), Vercel
- **Architecture:** Queue/Worker Systems, Microservices, MVC, MERN Stack, Event-Driven, OAuth 2.0, AI Integration Workflows
- **Tools:** Git, GitHub, GitLab, Postman, Swagger, Jira, Trello, VS Code, Webpack, Vite, npm, yarn
- **Methodologies:** Agile, Scrum, TDD, AI-Assisted Development, Code Review, Full SDLC

WORK EXPERIENCE

Full Stack Developer | Twenty4 Industries

2025 – Present

A product-based company specializing in gold, retail, and insurance technology solutions.

- Building Gold360 and Twenty4 Insurance Cover from scratch using MERN Stack with TypeScript, leveraging Claude Code and Claude Sonnet 4.6 for AI-assisted code generation, debugging, and code reviews — reducing development time by 40%.
- Developing the twenty4.in website and 3 mobile apps — Twenty4 Retailer, Twenty4 CP, Twenty4 Admin — using React Native with responsive design and REST API backends, optimizing for user engagement across devices.
- Implementing CI/CD pipelines, Docker containers, Nginx reverse proxy on VPS for zero-downtime deployments.
- Architecting scalable backend with queue/worker patterns, Redis caching, Firebase notifications, and PostgreSQL/MongoDB handling 10K+ daily transactions.
- Integrating GPT-5.4 and Gemini 3 Pro APIs for AI-powered content generation, automated product descriptions, and intelligent customer support features within the Twenty4 ecosystem.
- Using Gemini Nano Banana for image generation and Veo 3.1 for video content creation to produce marketing assets, reducing creative turnaround from days to hours.

Senior Software Developer | Inno Valley Works

2025

- Gained hands-on experience with Salesforce technologies including Apex, Lightning Web Components (LWC), SOQL, and Triggers for enterprise CRM customization.
- Utilized Claude Opus 4.6 for complex Apex code generation and GPT models for automated test class creation, increasing development velocity by 2x.

Senior PHP Developer | Admonk

2024 – 2025

- Developed RESTful APIs for an ERP application, improving system connectivity and reducing data sync time by 40%.
- Built backend services using Laravel and CodeIgniter with MySQL for billing, inventory, and process automation modules.
- Provided REST API support for Android & iOS apps with JWT authentication and Postman-based API documentation.

Senior PHP Developer | Blazingcoders

2021 – 2024

- Delivered 15+ production projects across e-commerce, SaaS, CRM, and ERP domains using Laravel, CodeIgniter, and jQuery.
- Developed custom ERP, CRM, and billing systems with payment gateway integrations (Razorpay, Stripe) and role-based access control.
- Created REST APIs for 10+ Android/iOS mobile apps with JWT tokens, input validation, and rate limiting.
- Collaborated in Agile/Scrum teams — sprint planning, code reviews, daily standups, and mentoring junior developers on best practices.

Web Development Intern | ProPlus Logics

2020 – 2021

- Completed full-stack web development training and contributed to live client projects in a 5-month internship.

PROJECTS

Gold360 — Gold Management Platform | Twenty4 Industries

2025 – Present

- End-to-end MERN Stack + TypeScript platform for retailers to manage gold inventory, pricing, customer orders, and insurance in real-time.
- Built core modules: Dashboard, Buy/Sell, Live Gold Rates, Product Catalog, Orders, Chit Schemes, Customer Management, Role-Based Access, and Insights/Analytics.
- Integrated with MMTC (MMTC-PAMP) for live gold rates and physical gold sourcing, with AI-powered demand forecasting and analytics using the Claude API.
- Implemented role-based dashboards with Next.js SSR, Redux, and Tailwind CSS; designed RESTful API architecture with Express.js, MongoDB aggregation pipelines, and Redis caching for sub-200ms responses.

COVR — Twenty4 Insurance Cover (InsurTech) | Twenty4 Industries

2025 – Present

- Insurance product integrated within the Twenty4 ecosystem — customers purchase and manage gold-backed policies online.
- Integrated with ICICI Lombard for automated policy issuance and GPT-5.4-powered policy document generation.
- Built secure payment flows with JWT auth, webhook-based activation, and automated email/SMS notifications via Firebase.

Twenty4 DigiGold — Digital Gold Investment App | Twenty4 Industries

2025 – Present

- Digital gold mobile app enabling customers to buy, save (SIP), and redeem gold in real time, with a secure wallet, live pricing, and full transaction history.
- Integrated MMTC-PAMP for live gold rates and physical gold backing, payment-gateway buy/sell flows, and JWT-secured REST APIs with Firebase push notifications.

HRMS Admin 360 — HR & Payroll Management Platform | Twenty4 Industries

2025 – Present

- Internal HR and payroll admin platform managing employee records, attendance, leave, and payroll workflows with role-based access control (RBAC).
- Built with React admin dashboards, Node.js/Express, and PostgreSQL/MongoDB; RESTful APIs with JWT authentication and reporting/analytics dashboards.

Twenty4 Mobile Apps (Retailer, CP, Admin) | React Native

2025 – Present

- 3 React Native mobile apps — B2B ordering (Retailer), channel partner management (CP), and operations dashboard (Admin).
- Integrated Firebase push notifications, deep linking, offline-first sync, and REST APIs deployed on Docker/Nginx VPS.

E-Commerce & SaaS Web Applications | Blazingcoders

2021 – 2024

- Built 10+ production websites (Live Training, RBS Autos, Share Trading Education, BG Products, Ibis Guidance, Keerthi Pumps, Credbal, Bakers Foods India, Uber for Babysitters, Yetunde's Kitchen) using Laravel & CodeIgniter, with payment gateways (Razorpay, Stripe), admin dashboards, product catalogs, and Linux/Windows server deployments.

ERP, CRM & Billing Systems | Blazingcoders & Admonk

2021 – 2025

- Custom ERP applications automating inventory tracking, invoicing, purchase orders, and resource allocation for multi-industry clients; CRM systems with lead management, follow-up automation, and reporting dashboards using PHP and MySQL.

Mobile App REST APIs — Android & iOS (10+ Apps)

2021 – 2024

- Backend REST APIs for Ibis Guidance, BG Products, Credbal, Grouppal, Intekwise Billing, and Yetunde's Kitchen (Android & iOS), with secure endpoints, JWT tokens, rate limiting, and Swagger/Postman API documentation.

AI TOOLS & PRODUCTIVITY

- Claude Code & Claude Cowork: Daily use of Claude Opus 4.6, Sonnet 4.6, and Haiku 4.5 for AI-assisted coding, architecture design, code reviews, debugging, and automated documentation — reducing development cycles by 40%.
- OpenAI GPT Models: Integration of GPT-5.4, GPT-5.3 Instant, GPT-5.3 Codex for automated content generation, intelligent chatbot features, test case generation, and code refactoring within product workflows.
- Google Gemini & Creative AI: Leveraging Gemini 3 Pro for multimodal reasoning, Nano Banana (Gemini 2.5 Flash Image) for AI image generation, Imagen 4 for product visuals, and Veo 3.1 for AI video generation — accelerating marketing asset creation by 5x.
- LLM & RAG Knowledge: Proficient in Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Agentic AI patterns, and AI Agent architectures — integrating these into modern project setups with vector databases, embeddings, and context-aware automation pipelines.
- AI Integration Development Workflow: Implementing AI across the entire SDLC — from AI-assisted planning and architecture to AI-powered code generation, automated testing, documentation, and deployment scripts — achieving a measurable 3x productivity boost.

ACHIEVEMENTS

- 3x Productivity Boost: Achieved measurable 3x development speed increase by integrating AI tools (Claude Code, GPT, Gemini) across coding, testing, documentation, and deployment workflows.
- 30+ Successful Deliveries: Delivered 30+ end-to-end production projects and applications with high client satisfaction across e-commerce, ERP, CRM, fintech, insurance, and mobile-API domains.
- Project Delivery Ahead of Schedule: Delivered complex ERP module 1 week early, earning management recognition and performance reward.
- Full Stack + AI Transition: Successfully evolved from PHP backend developer to Full Stack MERN + AI Integration Developer, expanding capabilities across React.js, Node.js, TypeScript, DevOps, and AI/LLM integration.
